

MUNICIPAL SERVICES

At MSE Group, we understand that our success is directly linked to how effective we are in developing and implementing creative solutions to meet our clients' needs. A successful outcome requires that we focus on more than just the technical aspects of a project. It requires an in-depth understanding of the increasingly complex regulatory, institutional, and public policy issues affecting our clients. It also requires a commitment to excellence and the ability to thrive in a teaming environment—a cornerstone of success in the municipal sector.

MSE Group has successfully completed a broad range of environmental and construction projects for municipal clients. We currently hold multiple contracts as a prime and routinely serve as a specialty subconsultant for many others in the A/E/C industry. Our technical depth and experience on large multinational projects in the federal sector offer unique opportunities and capabilities for our municipal sector partners.

ABOUT US FOUNDED IN 2002

MSE Group is an international environmental, engineering, and construction firm. Success for our clients, teaming partners, and employees is derived from an intense work ethic and the ability to enjoy the journey.

We are an SBA-certified 8(a), EDWOSB 8(m), DBE business with additional state and local small business and minority certifications throughout Texas, Florida, and the southeastern United States. We stand ready to support your needs and prove why we are **EXCEEDING EXPECTATIONS EVERY TIME.**
