

JEAN M. STRICKLAND

PROFESSIONAL EXPERIENCE

Jean Strickland joined MSE in 2017 after owning and operating Strickland Environmental, Inc., for 10 years.

Jean has been providing comprehensive ecological services to both public and private clients for more than 20 years. She has extensive experience in natural community assessments, documentation, and agency coordination. With her keen attention to detail, Jean keeps projects on track and within budget.

AREAS OF EXPERTISE

- Ecological site assessments for wetland and threatened and endangered species involvement
 - Federal and state wetland and wildlife regulatory coordination for linear (roadway, trails, etc.) landfill and land development projects
 - Documentation preparation to meet NEPA standards in the completion of project development and environment (PD&E), environmental assessment (EA), and environmental impact statement (EIS) documents
- Project management to facilitate on-time and on-budget delivery of projects

PROJECT EXPERIENCE

Florida Department of Transportation District Five: SR435 Kirkman Road – Safety Improvement, Environmental Permitting Support, Orange County, Florida

Environmental Services Lead. MSE Group teamed with CES to provide services for the review and evaluation of wetland communities within limits of the SR 435 Kirkman Road project, approximately 3.5 miles. Activities included wetland and other surface water identification, threatened and endangered species evaluations, agency coordination, and permit strategies that resulted in no permit necessary for this project.

Florida Department of Transportation District Five: SR 50 Resurfacing, Restoration and Rehabilitation, St. Johns Bridge to County Line, Environmental Permitting, Brevard County, Florida

Environmental Services Lead. MSE Group is teamed with CES to provide services for the review and evaluation of wetland communities from the St. Johns bridge to the Brevard County line, approximately 5 miles. Tasks for this project include wetland and surface water identification, threatened and endangered species evaluations (specifically the wood stork, limpkin, and crested caracara). Permit coordination will be included after the design phase is complete.

Strickland Environmental, Inc.: Environmental Consulting, Winter Park, Florida

Owner/Operator. Environmental consulting firm providing comprehensive ecological services to public and private clients. Responsible for various tasks on numerous projects for Florida Department of Transportation, which involved the following:

- Preparation of more than 300 NEPA documents for wetland and wildlife constraints associated with linear corridors
